Humanized IgG Monoclonal Antibody against SARS-CoV-2 S1

Cat No.: 41A233  Specification:  450μl per vial

Description
An IgG monoclonal antibody to SARS-CoV-2 S1 with high affinity was screened and the variable regions were grafted into a template human IgG framework. The humanized monoclonal antibody (MAb) is mimic to the IgG antibody in the patients’ serum or plasma specimens, and can react with coated antigens and secondary detectors in ImmunoDiagnostics High-sensitive SARS-CoV-2 S1 IgG ELISA Kit (Cat No. 41A232) as the positive control.

This product is intended for use by professional persons only.
This product is intended for research use only.

Application
Ready-to-use positive control for SARS-CoV-2 S1 IgG ELISA.
100 μl per ELISA test.

Reconstitution
Add 450 μl deionized water into each tube and let the lyophilized pellet dissolve completely.

Storage
Store the lyophilized antibody at -20°C for long-term storage.
After reconstitution, store at 4 degrees for short-term storage (3 days) or store in aliquots at -80 degrees for long-term storage. Avoid frequent freeze-thaw cycles.

Quality Control Test
The purity of humanized IgG MAb to SARS-CoV-S1 is characterized by SDS-PAGE while the activity is evaluated by ELISA.
The Absorbance at 450nm of ready-to-use humanized IgG MAb to SARS-CoV-2 S1 is above 1.
